gist:NaturalLanguage
A human language such as English or Spanish.

Subclass of **gist:Language**

owl:deprecated true

gist:ComputerLanguage
A language which could be executed by a computer.

Subclass of **gist:Language**

owl:deprecated true

gist:OrderedMember
A member of an **OrderCollection**; necessarily precedes or is preceded by another **OrderMember** in the same collection (just part cannot be listed in OWL). No **OrderMember** can be in more than one **OrderCollection**.

(NS) **gist:orderMemberOf** some **gist:OrderCollection**

Subclass of **owl:Thing**

owl:deprecated true

gist:Agent **owl:OR**

gist:SocialBeing

gist:ComputerProgram

owl:deprecated true

gist:ComputerProgram
Content (code) that converts inputs into outputs.

gist:Content

gist:expressedIn some **gist:ComputerLanguage**

owl:deprecated true

gist:MarriedCouple
The entity that can engage in contracts, as joint tenants, tenants in common, etc.

Subclass of **gist:Organization**

(N) **gist:party** exactly 2 **gist:Person**

(N) **gist:directlyRecognizedBy** some **gist:GovernmentOrganization**

owl:deprecated true

gist:UnitedNations

Subclass of **gist:Organization**

(N) **gist:directlyRecognizedBy** some **gist:GovernmentOrganization**

owl:deprecated true

gist:DelegatedAgent **owl:AND**

gist:Agent

gist:onBehalfOf some **gist:SocialBeing**

owl:deprecated true

gist:Term
Narrative description of the specifics of an offer. This is "terms" in the sense of the "terms" of a contract.

Subclass of **gist:Content**

owl:deprecated true

gist:Ownable
That which can (at least theoretically) be owned. All current jurisdictions have rules against owning people, but that needs to be expressed in rules rather than definitions.

gist:Content

gist:Organization

gist:Permission

gist:PhysicalThing

gist:Money

owl:deprecated true

gist:Artifact
Something intentionally made.

owl:AND

gist:Ownable

gist:producedBy some **gist:Agent**

gist:hasGoal some **gist:Person**

owl:deprecated true

gist:ARule
An evaluable set of criteria (might be machine interpretable but in this case mostly human interpretable).

owl:deprecated true

gist:Criteria
A set of guidelines used in making a decision. General term that covers Rules, Laws and programmable criteria.

Subclass of **gist:Intention**

owl:deprecated true

gist:MediaType
The first level is media types like oil, or marble, paper or electronic, then we get to specific MIME types.

Subclass of **gist:Category**

Equivalent to **gist:GeneralMediaType**

owl:deprecated true

gist:Media
Low level primitive for stored information, e.g. could be paper, electronic, etc.

owl:AND

gist:PhysicalSubstance

gist:categorizedBy some **gist:Media Type**

owl:deprecated true

gist:Medium

gist:PhysicallyLocatable
Can be found in the real world; includes counties as well as cities.

owl:OR

gist:PhysicalIdentifiableItem

gist:GeoPrimitive

owl:deprecated true

gist:RelativeLocation
Location relative to an origin.

(N) **gist:regarding** some **gist:Origin**

(N) **gist:Offset** some **gist:Extent**

(N) **gist:yOffset** some **gist:Extent**

(N) **gist:zOffset** some **gist:Extent**

owl:deprecated true

gist:Conversion
An event where one or more inputs is transformed by an Agent in some way to produce one or more outputs, e.g. calculation, manufacturing process.

owl:AND

gist:Event

gist:producedBy some **gist:Agent**

gist:affects min 1 **gist:Ownable**

gist:input min 1 **owl:Thing**

gist:output min 1 **owl:Thing**

owl:deprecated true

gist:Movement
The event of something moving along a route from A to B where some Agent does the moving. The thing moved is **Ownable**. This excludes things that move on their own e.g. water down a hill.

owl:AND

gist:Event

gist:producedBy some **gist:Agent**

gist:affects min 1 **gist:Ownable**

gist:fromPlace some **gist:Location**

gist:toPlace some **gist:Location**

owl:deprecated true

gist:GeoPrimitive
Any of the primary geographical shapes.

owl:OR

gist:GeoPoint

gist:GeoRegion

gist:GeoSegment

owl:deprecated true

gist:Location **owl:OR**

gist:RelativeLocation

gist:GeoPrimitive

owl:deprecated true

gist:Origin
Description of a place, physical or abstract, that can be used to position other items relative. The origin might be the top left of a screen or form, or it might be the back, lower left corner of a table.

owl:deprecated true

gist:NonPhysicalSubstance
A substance in the sense that there is measurably more or less of it, but not necessarily physical (money and content, for instance).

owl:deprecated true

gist:Money
Paper or electronically transferable monetary asset. Not a price, but an asset.

Subclass of **gist:NonPhysicalSubstance**

(N) **gist:hasMagnitude** some **gist:Monetary**

owl:deprecated true

gist:Ratio **owl:AND**

gist:Magnitude

gist:hasUoM some **gist:RatioUnit**

owl:deprecated true

Equivalent to **gist:RatioMagnitude**

gist:SpeechAct
A communication event, such as making a commitment, placing an order, making a request, complaining, listing a warning or refusing. Not necessarily oral. Loosey based on Searle. We will say that People and Organizations can make speech acts, but not computer programs.

owl:AND

gist:Event

gist:producedBy some **gist:SocialBeing**

gist:affects min 1 **owl:Thing**

owl:deprecated true

gist:Offering
A description of the thing being offered, (its features, etc.).

(N) **gist:describedIn** some **gist:Form**

owl:deprecated true

gist:ServiceOffering
A description of something that can be done for a person or organization (which produces some form of an "act").

owl:AND

gist:Offering

gist:produce some **gist:Behavior**

owl:deprecated true

gist:ProductOffering
Offering something which could be purchased.

owl:AND

gist:Offering

gist:regarding some **gist:Ownable**

owl:deprecated true

gist:agentFrom (gist:fromAgent)

owl:deprecated true

gist:agentTo (gist:toAgent)

owl:deprecated true

gist:allowedBy (gist:allow)

owl:deprecated true

gist:categorizes (gist:categorizedBy)

owl:deprecated true

gist:characterize (gist:characterizesAs)

owl:deprecated true

gist:connectedTo

gist:allocates (gist:allocatedBy)
The subject (an Agent) sets aside or reserves the Object (usually an **Ownable**).

owl:deprecated true

gist:affects

gist:basisFor (gist:basisOf)
Reason, law, rule, etc. behind an action or decision.

owl:deprecated true

gist:directlyRecognizes (gist:directlyRecognizedBy)

owl:deprecated true

gist:getterOn (gist:getter)

owl:deprecated true

gist:giverOn (gist:giver)

owl:deprecated true

gist:hasConnection (gist:connectedTo)

owl:deprecated true

gist:madeInto (gist:madeUpOf)

owl:deprecated true

gist:occurrences (gist:occurredAt)

owl:deprecated true

gist:partyTo (gist:party)

owl:deprecated true

gist:placeFrom (gist:fromPlace)

owl:deprecated true

gist:placeTo (gist:toPlace)

owl:deprecated true

gist:precededBy (gist:precedes)

owl:deprecated true

gist:preventedBy (gist:prevents)

owl:deprecated true

gist:produce

gist:produceOffspring (gist:offspringOf)
To be the biological parent of. Used instead of parent because parent is highly overloaded term.

owl:deprecated true

gist:requiredBy (gist:requires)

owl:deprecated true

gist:usedToExpress (gist:usedBy)

owl:deprecated true

gist:directlyRecognizes (gist:directlyRecognizedBy)

owl:deprecated true

gist:featureOf (gist:hasFeature)

owl:deprecated true

gist:goalOf (gist:hasGoal)

owl:deprecated true

gist:connectedTo

gist:hasBeenAllocated (gist:allocatedTo)
Meaning that the subject has been assigned or reserved or set aside to the object. Funds can be allocated to projects, people (really their time) can be allocated to tasks, departments, or organizations. There will likely be many subtypes of this with varying shades of meaning for how flexible the allocation has been made.

owl:deprecated true

gist:affects

gist:causeBy (gist:causedBy)
The subject will or did cause the object.

owl:deprecated true

gist:containedIn (gist:contains)

owl:deprecated true

gist:contains (gist:containedIn)
Generic relationship meaning the Subject contains or includes the Object in some way.

owl:deprecated true

gist:governs

gist:controlledBy (gist:controls)
This is the essential agentive relationship. If I've been delegated the right to enter into a contract on someone's behalf, I'm their agent in that context, but we'll say they control the ability to enter into a contract.

owl:deprecated true

gist:connectedTo

gist:onBehalfOf (gist:onBehalfOf)

owl:deprecated true

gist:connectedTo

gist:delegatesTo (gist:delegatesTo)

owl:deprecated true

gist:connectedTo

gist:onBehalfOf (gist:onBehalfOf)

owl:deprecated true

gist:connectedTo

gist:delegatesTo (gist:delegatesTo)

owl:deprecated true

gist:controls (gist:controls)

owl:deprecated true

gist:controls (gist:controls)

gist:guardianOver (gist:hasGuardian)
owl:deprecated true

gist:controls (gist:controls)

gist:presidedOverBy (gist:presidesOverBy)
owl:deprecated true

gist:controls (gist:controls)

gist:hasJurisdiction (gist:presidesOverBy)
owl:deprecated true

gist:connectedTo

gist:physicalLocationOf (gist:physicalLocationOf)
owl:deprecated true

gist:connectedTo

gist:hasPhysicalLocation (gist:physicalLocationOf)
owl:deprecated true

gist:hasPhysicalLocation

gist:permanentLocationOf (gist:permanentLocationOf)
owl:deprecated true

gist:hasPhysicalLocation

gist:hasPermanentLocation (gist:permanentLocationOf)
owl:deprecated true

gist:connectedTo

gist:inputOn (gist:inputOn)
owl:deprecated true

gist:connectedTo

gist:input (gist:inputOn)
owl:deprecated true

gist:connectedTo

gist:outputOn (gist:outputOn)
owl:deprecated true

gist:connectedTo

gist:output (gist:outputOn)
owl:deprecated true

gist:connectedTo

gist:inRegard (gist:inRegard)
owl:deprecated true

gist:connectedTo

gist:regarding (gist:inRegard)
owl:deprecated true

gist:regarding

gist:supersededBy (gist:supersedes)
owl:deprecated true

gist:regarding

gist:supersede (gist:supersedes)
owl:deprecated true

gist:connectedTo

gist:usedBy (gist:usedBy)
owl:deprecated true

gist:connectedTo

gist:use (gist:usedBy)
owl:deprecated true

gist:hasFeature

gist:Offset (gist:offset)
How far in the "x" dimension this item is from its local origin.
owl:deprecated true

gist:hasFeature

gist:Offset (gist:offset)
How far in the "y" dimension this item is from its local origin.
owl:deprecated true

gist:hasFeature

gist:Offset (gist:offset)
How far in the "z" dimension this item is from its local origin.
owl:deprecated true

gist:baseUnit (gist:baseUnitOf)
The Object is the BaseUnit of the Subject.

owl:deprecated true

gist:hasBaseUnit

gist:hasBirth (gist:birthOf)
Date a living thing was born (or germinated, for plants).

owl:deprecated true

gist:hasBirthDate

gist:isDirectPartOf (gist:isPartOf)
owl:deprecated true

gist:hasBaseUnit

gist:produce (gist:produces)
The subject creates the object, i.e. a task produces a deliverable; a template produces a program.

owl:deprecated true

gist:produces

gist:label (gist:labelOf)
owl:deprecated true

gist:text (gist:hasText)
owl:deprecated true

gist:containedText (gist:containsText)
owl:deprecated true

gist:BaseUnit - cubicMeter (gist:cubicMeter)
owl:deprecated true

gist:BaseUnit - squareMeter (gist:squareMeter)
owl:deprecated true
